

ONGETTA – international leader for silk yarn production keeps sponsoring SIC58 Race Team in 2019

“The opportunity to see the name of our company next to Marco’s and to his team name gives us the shiver. We met him and sustained him in 125cc when he was only a young boy. He was already passionate and ravenous and a lot of willingness to grow without ever giving up.

With this mindset that unites with our everyday life in our business, we accepted Paolo’s challenge. A challenge beginning with the minor classes, which give us the possibility to make them grow as well as to teach Marco’s values to our riders with the hope they will be the future in the world championship team.

This year we extended our commitment to a new class: Moto E, where our team take our name together with Marco’s: ONGETTA-SIC58 Squadra Corse.

Already with the textile industry we started choosing a long path towards environmental sustainability: Ongetta for its silk aims to be on the front line with this and strongly believes in sustainable fashion. We thought it is a great idea to associate our new organic products with electric bikes (Moto E). They will make the same noise, but we hope it will be as exciting and fun! We wanted to be there!

You will see us line up in 4 Cups:

- World Championship, Class Moto 3 with Niccolò Antonelli and Tatsuki Suzuki
- World Championship Class Moto E with Mattia Casadei
- Junior World Championship FIMCEVREPSOL, Class Moto 3 with Matteo Bertelle, Matteo Patacca and Hikaru Arita
- European Talent Cup with Mattia Falzone and Mattia Volpi

This will be the third year together, the results will always be a question mark, but in the races as in our job it is important to bring the same tenacity that as always be driven by Marco! The achievement will arrive.”
